

Marcin Wilk

Tokyo, Japan | marcin.wilk.503@gmail.com | marcin-wilk.com

SKILLS

Technical Skills: JavaScript, React, Tailwind CSS, Node.js, TypeScript, PostgreSQL, Express.js, Next.js, HTML, CSS, Python, Git, Prisma, Vite

Languages: Polish: Native, English: TOEIC 990/990, Japanese: N2

Certifications & Training: CS50P (Harvard University)

EDUCATION

Tokyo University of Foreign Studies

Bachelor

Major in Japan Studies; Government MEXT scholarship recipient

Tokyo, Japan

Apr 2023 - present

Wyższa Szkoła Języków Obcych w Poznaniu

Bachelor

Major in Japan Studies

Poznań, Poland

Oct 2019 - Jul 2022

SIDE PROJECTS

BLOG API

- Developed a scalable full-stack blog platform using Express, Prisma, and PostgreSQL with two independent React + TypeScript frontends (reader and admin), implementing JWT authentication, role-based access control, and a Tailwind CSS-based UI.
- Designed and structured the app architecture to separate frontend and backend layers, gaining experience in modular project organization, API integration, and future scalability

GAME MARKETPLACE LOOKUP

- Built a server-rendered inventory management app using Node.js, Express, and EJS templates with Tailwind CSS, featuring item search and filtering from a game's market database.
- Implemented CRUD functionality allowing category and item management while securing deletions through password verification for basic data protection.

CV MAKER

- Developed a CV builder web app demonstrating strong understanding of React fundamentals, component-based architecture, and state management for dynamic form handling.
- Implemented real-time CV preview and PDF export features, enabling users to input, visualize, and print their personal and professional information seamlessly.

ADDITIONAL

Current Study: Currently taking **The Odin Project**, a comprehensive full-stack web development curriculum focused on JavaScript, Node.js, React, and modern web practices. Completed over 80% of the program, gaining hands-on experience in building full-stack applications.

Future Goals: Getting AWS Cloud Practitioner certificate and exploring DevOps fundamentals and cloud integration to complement full-stack development skills.
